los diferentes países han pretendido mejorar la calidad educativa por su relación directa con la calidad de vida la movilidad social y la transformación

del contexto uno de los instrumentos utilizados de manera generalizada para evaluar la calidad de la educación son las denominadas pruebas a gran escala en Colombia buscando mejorar el desempeño de los estudiantes en las pruebas censales aplicadas por el ICES denominadas Saber 3º, 5º, 9º y 11º y como respuesta a los bajos indicadores relacionados con estudios de posgrado por parte de los docentes se implementó una política desde el año 2015 que fue la denominada como programa becas para la excelencia docente BED del Ministerio de Educación Nacional de Colombia. Desde esta perspectiva la presente investigación tuvo como objetivo establecer y analizar las relaciones existentes entre la formación posgradual docente derivada de este programa, el desempeño de los estudiantes de educación básica primaria, básica secundaria y media de las entidades de la Guajira, Risaralda y Quindío en las pruebas Saber durante el período 2015 a 2020 y la iniciativa de conformación y permanencia de comunidades de aprendizaje derivada de una de las exigencias de dicho programa. Se asume un diseño correlacional que permite establecer la relación entre el desempeño de los estudiantes en las pruebas Saber 5º, 9º y 11º, la cantidad de docentes con formación posgradual de la Guajira, Risaralda y Quindío, beneficiarias del programa BED y conformación y permanencia de las comunidades de aprendizaje docente durante el período 2015 a 2020. Esta investigación y sus hallazgos contribuyen al campo de análisis sobre el impacto e incidencia de los programas de formación posgradual docente en el aprendizaje de los estudiantes desde una perspectiva local, regional y nacional. De igual forma, se convierte en un insumo para que las maestrías encargadas de esta formación tomen decisiones frente a la naturaleza de sus apuestas curriculares con miras a la promoción de la calidad educativa en sus contextos de influencia.

es una obra producida por el departamento de redacción y diseño para el Instituto Guatemalteco de Educación Radiofónica IGER.

En la serie *La crisis de la ideología burguesa y la doctrina del modo de pensar*, el tercer tomo trata de la crisis de la ciencia natural burguesa. En general, los científicos en ciencias naturales gozan de gran prestigio en la sociedad burguesa porque son aparentemente apolíticos, irrefutables y comprometidos únicamente con el progreso social. Sin embargo, con el avance del positivismo y pragmatismo, las ciencias naturales han perdido considerablemente en científicidad y han entrado en crisis. Este escrito polémico pretende reavivar en la clase obrera el pensamiento libre con base materialista, sin liberarse de las ataduras del idealismo y la metafísica. La humanidad no llegará a estar en condiciones de utilizar las conquistas de las ciencias naturales modernas para el progreso social de este modo. Este libro es también imprescindible para toda científica y todo científico militante. El libro sirve al objetivo de darle nuevo prestigio al socialismo científico y a su método materialista dialéctico.

A comprehensive work covering the about 100 000 species of coleoptera known to occur in the palaearctic region the complete work is planned for 8 volumes that will be published in intervals of about 18 months the information provided for each species will be the following primary taxonomic information of all available names in the genus and species levels published by the end of 1999 the taxonomic information below subfamily will be organized alphabetically the type species of genera and subgenera incl synonyms are given the area covered also includes the Arabian peninsula
